

Network Storage from a Macintosh

1. From the Finder, press **Command K**.
Your Mac needs to be running Tiger (OS 10.4) or higher for this to work.
2. In the Connect to Server box, type your Network Storage address according to the example below:

3. Click **Connect**.
4. When prompted, enter your **Oak ID** and **password**.
5. Your Network Storage will appear on your desktop as a disk icon with the same name as your Oak ID.
